You look at me and then you walk away you say words only you can say I want you like I do

You step outside in the blistering rain You tell me all I need to hear again And I want you like I do

Couldn't kill it if you tried It's up to fate to decide Nothing'ss ever lost unless you want it to

I'll run away with you

You take me to the place that you know best There's not much time we should be moving fast If we want to
Make it through

You laugh at me, you're playing hard to get You say trouble hasn't found us yet And you want me Like you do

Couldn't kill it if you tried It's up to fate to decide Nothing's ever lost unless you want it to

I'll run away with you
I'll run away with you
