

# Indestructible

Armin van Buuren

Was all in the moment, like one in a million  
I found you in the stars, with a heart made of glass  
But the fire in your eyes, to me electrifies  
As you and i collide

We could be safe, we could be alive  
We could be free for the first time  
It's gotta be here  
It's be now  
It's gotta be with you  
Stand next to me  
Stand next to me  
If you stand next to me  
We could be indestructible  
Stand next to me, stand next to me  
You're everything i need  
We could be indestructible

A fragile heart that keeps me warm  
A little piece of heaven shining in the storm  
If the fires gonna burn it's you that's gonna put me out  
And if the rain falls down we'll rise above  
Carry you home, carry you through the flood  
Carry you through the flood

We could be safe, we could be alive,  
We could be free for the first time  
It's gotta be here  
It's gotta be now  
It's gotta be with you  
Stand next to me  
Stand next to me  
If you stand next to me  
We could be indestructible  
Stand next to me

Stand next to me, stand next to me  
You're everything i need  
We could be indestructible
