

I wanna say this
I'm coming around
I wanna be there
The next time your heart is found
Don't try to starve me
I'm coming tonight
I wanna be there the next time your heart ignites

And everything that you've done
You've done it with love
you've done it all because

I'm gonna stay here
I'm coming to find
I've gotta be there
the next time your heart ignites

And everything that you've done
You've done it with love
you've done it all because

You want to run from the pop stars and monsters and everybody loses their minds
You're trying to find mine and open my eyes
I've waited a long time

All by yourself
If you do it then you're losin' it all by yourself
All by yourself
If you do it then you're losin' it all by yourself
All by yourself
If you do it then you're losin' it all by yourself

You want to run from the pop stars and monsters and everybody loses their minds
You're trying to find mine and open my eyes
I've waited a long time

All by yourself
If you do it then you're losin' it all by yourself
All by yourself
If you do it then you're losin' it all by yourself
All by yourself
If you do it then you're losin' it all by yourself
