

Wrinkle In Time

Army of Freshmen

Lucky, you look down, do you notice me?
Do you remember the way it used to be?
Some summer, much younger, way over the under pass
I thought those days would last

I'll travel time
Flashback and make you mine
Before you star shined

I'll go back and find you
And somehow remind you
The way that we were
In the days far behind you

A wrinkle in time
Way back when you were mine
Way back when you were mine

Throwing wishes in a well, no parachute
You were half way hot and I was kinda cute
Together forever till time came and severed
What ever we had then is coming around again

Stone age second round
Big Ben coming down
Model T turn around

Long lost looking glass
Afghan covered past
HG wouldn't last

I'll travel time
Flashback and make you mine
Before your star shined

I'll go back and find you
And somehow remind you
The way that we were
In the days far behind you

A wrinkle in time
Way back when you were mine
Way back when you were mine

Stone age second round
Big Ben coming down
Model T turn around
Back in time

Long lost looking glass
Afghan covered past
H. G. wouldn't last
Back in time

Concrete buried deep
Cobblestone back street
Quantum physic leap

Back in time

Crash land, planet ape
Rewind, great escape
Right on time

I'll travel time
Flashback and make you mine
Before your star shined

And I rode the bench on life's sideline
Countdown, three, two, one, zero

I'll go back and find you
And somehow remind you
The way that we were
In the days far behind you

A wrinkle in time
Way back when you were mine
Way back when you were mine

I'll go back and find you
And somehow remind you
The way that we were
In the days far behind you

A wrinkle in time
Way back when you were mine
Way back when you were mine
Way back when you were mine
