

The World Is Changing

Arrested Development

The world is changing (changing) right before our eyes
The world is changing (changing) before we realize
The world is changing (changing) we better open our eyes
The world is changing (changing) right before our eyes

Everybody's dancing
Life is just a trolley car
Everybody's on a track but we don't know where were going at all
We're going down down down down down down
Crash going down a path we don't really wanna go

The world is changing (changing) right before our eyes
The world is changing (changing) before we realize
The world is changing (changing) we better open our eyes
The world is changing (changing) right before our eyes

Our senses are upside down
Now everybody's a clown
The music is so watered down
There's so many things that are happening now

I'm just frustrated so I'm thinking out loud
Maybe we can find our path in the lost and found
Everybody's dancing
Life is just a trolley car
Everybody's on a track but we don't know where were going at all
l

We're going down down down down down down
Crash going down a path we don't really wanna go
Crash going down a path we don't really wanna go

The world is changing
The world is changing (changing) right before our eyes
The world is changing (changing) before we realize
The world is changing (changing) we better open our eyes
The world is changing (changing) right before our eyes

Everything is going crazy the world is really changing (repeat)
