

## Stars

## Arrows to Athens

Here is tomorrow  
Just past the sunrise  
My fingers reaching out  
'Cause we are believers  
The guards of the skyline  
The curse can't tie us down

We've waited so long  
We waited long enough

This is our right, this is our song  
This is our moment in history  
Ten million roads turn into one  
This is our fight, where we belong  
No one can take away destiny  
So let the night cover us all  
Stars will never fall

I try to remember  
Frozen in silence  
Our blood red beating cold  
But oh let the darkness  
Always remind us  
To never let this go

Keep holding on  
We've waited long enough

This is our right, this is our song  
This is our moment in history  
Ten million roads turn into one  
This is our fight, where we belong  
No one can take away destiny  
So let the night cover us all  
Stars will never fall  
Stars will never fall

So brave the dark  
'Cause the day is ours  
And there's nothing left to stop us  
'Cause we are believers  
The guards of the skyline

This is our right, this is our song  
This is our moment in history  
Ten million roads turn into one  
This is our fight, where we belong  
No one can take away destiny  
So let the night cover us all  
Stars will never fall  
Stars will never fall
