

You can take my hand
Let's fly together
To the lovers' land
Where passion makes the weather

You can take my all
Everything I own
Everything...

I met you in my dreams and I loved you,
Just tell me you're real 'cause I need you
And I feel you are here
When you're close to me love is real
Say that you believe me

Stars are shining brighter
Night is getting whiter
I'm waiting for a sunrise
to open your eyes
Your beautiful eyes

You can take my all
Everything I own
Everything I own...

I met you in my dreams and I loved you,
Just tell me you're real 'cause I need you
And I feel you are here
When you're close to me love is real
Say that you believe me

Love you, love you, love you, love you, love you
like no one loves you
I ain't gonna leave you anymore
Love you, love you, love you, love you, love you
like no one loves you
I ain't gonna leave you anymore

I met you in my dreams and I loved you,
Just tell me you're real 'cause I need you
And I feel you are here
When you're close to me love is real
Say that you believe me

I met you in my dreams and I loved you,
Just tell me you're real 'cause I need you
And I feel you are here
When you're close to me love is real
Say that you believe me

I love you!
