

## Black Society

Arthemis

Tonight i woke up from myself  
Searching for something that I am  
I watch the people all around me  
Tonight I woke up from myself  
Voices are whispering in my head  
Something I'd better not tell

Can you hear them screaming  
Can you hear the voices calling my name  
No I can't believe it  
They will never understand

I wake up in the morning  
And all I get is something to forget

Can you hear them screaming  
Can you hear the voices screaming my name  
Let my heart stop beating  
Nothing more will be the same

We're living in danger  
We live in the black society  
No place for a stranger  
You're part of the black society, black society

I watch the war inside my head  
Spinning around in my black bed  
I talk but no one seems to care  
How can it be? Am I going mad?  
God give me a reason for this shame  
You're the one who knows my restless pain

We're living in danger  
We live in the black society  
No place for a stranger  
You're part of the black society, black society
