

# Out Of The Sky

Artillery

Feel the radiation burn  
Hope there's none left for you  
You're searchin' for a place to hide  
Why there's no where to run

Out of the sky you're the first one to die  
Out of the sky you never know why  
Out of the sky you're the first one to die  
Out of the sky

It killed your friends and enemies  
No leaves no one alive  
It killed anything no one survive  
My god in a dessert of storm

The clear blue sky has turned to red  
There's no more life on planet earth  
Now radiation is mighty king  
There's no more life not anything
