

All I Got

Arven

Another day, another night
The world goes on, time goes by
But for me the time has stopped, has stopped
You're here by me, where you belong
We laugh and kiss, our love is strong
Another second, another minute of my dream

Your friendly smile gives me that peaceful feeling
Your gentle touch shows me how much you care
Please hold me near, let me forget all the world around
No one exists beside you and me right now

You were the one I had to love
With all my faith, all my heart
I reached for you, you took my hand, my hand
A special time, a special bond
I found what I was looking for so long
A place to see one another
For who we really are

Your friendly smile gives me that peaceful feeling
Your gentle touch shows me how much you care
Please hold me near, let me forget all the world around
No one exists beside you and me right now

Your friendly smile gives me that peaceful feeling
Your gentle touch shows me how much you care
I feel the warmth of your hand on my skin and it's all I got
My memories of times that now have passed...
