

## Believe

Arven

One day as a child you open your eyes  
And see the world around open wide  
Ready to explore adventures of life  
You set out on the journey

But one day you'll learn that not all dreams will come true  
Sometimes we must face grief and loss  
Blinded by fear, lost in the dark  
At some point you will need all the strength that you've got

High above there is a star that shines bright for me  
Gives warmth and light  
And in times of need I know for sure  
There is someone who believes in me

Totally excited you open your heart  
To make a former stranger your special one  
Magical connection, two hearts beat as one  
You're sure it lasts forever

But one day you'll learn that not all dreams will come true  
Sometimes we must face grief and loss  
Blinded by fear, lost in the dark  
At some point you will need all the strength that you've got

High above there is a star that shines bright for me  
Gives warmth and light  
And in times of need I know for sure  
There is someone who believes in me

Certainly not all dreams will come true  
Sometimes we must face grief and loss  
Blinded by fear, lost in the dark  
At some point you will need all strength that you've got

High above there is a star that shines bright for me  
Gives warmth and light  
And in times of need I know for sure  
There is someone who believes...

High above there is a star that shines bright for me  
Gives warmth and light  
And in times of need I know for sure  
There is someone who believes in me
