

In Your Dreams

Arven

Deep in the silent ocean
High up in the sky
Second to the right and
Straight on till morning comes

There is a place where you can find what you seek
This path shows you the right way
There is a place where you can find your true love
In the land of children's dreams

Flying in the moonlight
Stars shining down so bright
Fairies' light will guide you
Straight to the secret shore

Don't be afraid, just close your eyes
Your dreams will come true if you try

There is a place where you can find what you seek
This path shows you the right way
There is a place where you can find your true love
In the land of children's dreams

Waiting to be explored
The land of adventures lies
It can be found by everyone
With an open heart

Don't be afraid, just close your eyes
Your dreams will come true if you try

There is a place where you can find what you seek
This path shows you the right way
There is a place where you can find what you seek
This path shows you the way
There is a place where you can find what you seek
This path shows you the right way
There is a place where you can find your true love
In the land of children's dreams

Tell me can you remember
Back in your childhood's days
You believed that every wish
Is just one step away

Don't be afraid, just close your eyes
Your dreams will come true if you try

There is a place where you can find what you seek
This path shows you the right way
A place where you can find what you seek
This path shows you the right way
There is a place where you can find what you seek
This path shows you the right way
There is a place where you can find your true love
In the land of children's dreams
