

The Only Constant Is Change

As I Lay Dying

The only constant is change. The only constant is change. Go...

The human heart is born without legs, sliding back and forth,
And never once does it truly rest, unless accompanied by death.
.. Sliding back and forth.

Even the strongest remnants of history, they have begun to crum-
ble against time.
Sliding back and forth.

The only constant is change. Nothing remains the same.
The only constant is change. There's only growth or decay. Yea.
..

Lets go... Unvarying scenes only found in pictures can never br-
eathe life.
For nowhere else does level ground exist, unless it has been ca-
ptured by a flash of steady light.

Sliding back and forth (back and forth).
The only constant is change. Uncertainty awaits.
The only constant is change. There's only growth or decay... or
decay.
The only constant is change...

There is nothing that stays the same, from the foundation of ou-
r lives.
There is nothing that stays the same. There is nothing to erase
time...

The only constant is change. Nothing remains the same.
The only constant is change. There's only growth or decay... Ye
aah...
The only constant is change (change). The only constant is chan-
ge.
