

Shooting from the hip
Slipping from an iron grip
Going further than I've ever been
Into the realms of the unseen
Fate is your enemy
Rebel against your destiny
Going further than I've ever been
Yeah further than I've ever been

Got a beautiful face got a fucked up inside
Need a shot of your faith
Come along for the ride
Yeah love is your faith
Yeah death is your fate

Never going to reach my goal
I know 'cos I have been told
Never finding happiness
Eternally in unrest
This is where the love lies
I've seen to the other side
It's always been just out of reach
Yeah but always just within my sight

Got a beautiful face got a fucked up inside
Need a shot of your faith
Come along for the ride
Yeah love is your faith yeah death is your fate
Yeah death is your fate come along for the ride

Going further than I've ever been

Got a beautiful face got a fucked up inside
Need a shot fo your faith
Come along for the ride
Yeah love is your faith yeah death is your fate
Yeah death is your fate come along for the ride
Got a beautiful face got a fucked up inside
Need a shot fo your faith
Come along for the ride
Yeah love is your faith yeah death is your fate
Need a shot of your faith come along
