

New Days

Lane, Asher

Here comes the sun it's for everyone
I wish the sky was all mine
Because we came from the ocean life
We swim like dolphins in time

Sometimes I wish that nothing would change
Whatever you do, I will see you the same

New days, fly away
Across the universe see you there
So blue days, and you know when we go
Across the universe
If you dare

We rise and shine with our sleepy eyes
We feel the sun on our skin
And deep inside I believe the time
Will come to hold you again

Sometimes I wish that nothing would change
Whatever you do, I will see you the same

New days, fly away
Across the universe see you there
So blue days, and you know when we go
Across the universe
If you dare

There's another New Day in your eyes
Another Me and You day, if we try
So carry all our troubles home,
Lay them by the riverside and wash them away
Fly away across the universe see you there

Fly away...

New days fly away
Across the universe see you there
So blue days, and you know when we go
Across the universe
If you dare...
