

## Send It

Ashford & Simpson

Send it  
Send it

Send it, send it  
Up, up and away  
You had it for a day  
Send it, send it  
Like a puff of smoke  
Spread a little hope

Never think at all that You possess  
'Cause it will never bring You happiness  
Love has its own will  
Take what You need to make each day sweet  
But then just like grains of wheat  
When it's over  
You've got to blow it to the fans of the windmill

Chorus:  
Send it, send it  
Just like it came to Me  
I'm gonna set it free  
Send it, send it  
You've got to let it go  
Open up a window

Don't You think it's best when You feel joy  
To let it all out before it spoils  
Let it run into everything  
I know You really doubt that it gets far  
But that's the reason He made the star  
When propels it, it travels faster than a laser beam

Repeat Chorus

Send a little love; send a little care  
It reaches everywhere; send it
