Arena

You can take it If you want it You can break it If you need it I'll never fight another day But you can take the flesh not the soul away They're calling from the lions den They're fighting for the ghosts of holy men Into the arena we climb We look to the sky Into the arena we climb You and I Is it over When the light goes? Bella nova Tell me who knows Scars will beat the minds of men Can you feel the thorns upon the skin? I'll never fight another day till I die Yes I hear you Yes I see you Yes I feel you And I need you Is it over, I'll never fight another day When the light goes? But you can take the flesh, not the soul away Bella nova, they're calling from the lions den Tell me who knows? They're fighting for the souls of holy men [Chorus]
