

# Black Hole Storm

Asphyx

A primitive phenomenon  
Unknown in theory  
Bursting from its quasar  
Erratic mystery  
Out of the supernova  
Comes where no-one could suspect  
Invisible interior  
Mortals can't detect  
Supermassive entity  
Primordial force  
Chaos in cosmos  
Upturn physical laws

Celestial bodies  
In orbit collide  
Satellites are drawn into  
The continuum inside  
Absorbing any matter  
Interstellar dust  
Universes torn apart  
Galaxies combust

Black hole storm  
Electromagnetic  
Black hole storm  
Intergalactic  
Black hole storm  
Extinguish suns  
Black hole sun  
Armageddon

Bursting protoplasm  
Thermal energy  
Solar radiation  
Crushing gravity  
Inside event horizon  
A surface in spacetime  
Lies the point of no return  
Where no light can shine  
Mass devouring voyager  
Consume infinity  
Deafening roaring silence  
Ending eternity  
Vanishing in darkened spheres  
The final glowing sun

Compressed to zero volume  
All nuclei are gone  
Black hole storm
