

# In The Name Of Rock

Astral Doors

I saw the writings on the wall right before my eyes  
Came out as soon I heard the call; reached for the sky  
Walked down the lane of make believe in the pouring rain  
I'm too clever, forever I will rule this kingdom of pain

Just a boy with the fist held high  
Long hair, mama cried  
I had power to blow them all away

In the name of rock  
I'll fight forever  
In the name of rock  
I've sworn the oath tonight, unite  
In the name of rock

Stray cat, living on the street, but the strong will rise  
Black dog; dirt under my feet; a lord in disguise  
This is the story of my life, this is all for real  
Wild attraction, a slave under the knife, addicted to steel

But the music found my way  
Made me what I am today  
There's a God and now I see the light

In the name of rock  
I'll fight forever  
In the name of rock  
I've sworn the oath tonight, unite  
In the name of rock

In the name of rock  
In the name of rock  
In the name of rock  
In the name of rock

Just a boy with the fist held high  
Long hair, mama cried  
I had power to blow them all away

In the name of rock  
I'll fight forever  
In the name of rock  
I've sworn the oath tonight, unite  
In the name of rock
