

# Shadowchaser

Astral Doors

There is crossroad between heaven and hell  
So many play us that song  
And it's easy now drifting away  
But you'll end up like all the rest  
As a shadow chaser

Life is an endless fight  
Nailed to the cross tonight  
The mark of the devil is pierced into your skin  
Let the madness begin

This fury and anger, just let it all out  
A new kind of virus is here  
Insulted people don't know what is right  
And no one seems to care  
But you see them everywhere  
I spit on your name

You're a shadow chaser  
With a twisted mind  
You're a shadow chaser; live and let die  
In a different world at another place  
On a different lane you could stop the chase

Stepping across the line  
Every single time  
The forces of evil has captured your soul  
So let the bad times roll

Extremely determined to do what it takes  
Power is sweeter than love  
You take what you want, you smash and grab  
No one gets the point; you're a soldier at the front

You're a shadow chaser  
With a twisted mind  
You're a shadow chaser; live and let die  
In a different world at another place  
On a different lane you could stop the chase

Shadow chaser  
Shadow chaser

This fury and and anger, just let it all out  
A new kind of virus is here  
Insulted people don't know what is right  
And no one seems to care  
But you see them everywhere  
I spit on your name

You better face it  
You're a shadow chaser  
You're hunting high and low  
Don't wanna miss the show  
When they play the final game

You're a shadow chaser

With a twisted mind  
You're a shadow chaser; live and let die  
In a different world at another place  
On a different lane you could stop the chase
