

## Comets (Nova I)

Atargatis

A burning nova in far spheres expands and burns  
Out of the inner core and sending comets through the skies  
Shot with flaming trail

Boundlessly they rush through the spheres and enter earth  
The atmosphere ablaze with massive fireballs  
That crush into the ocean tides

Nova comets burst the sea  
Earth crust burning, waters steam  
Nova comets burst the sea  
Waters flooding irresistibly

Come, drift into the wonder  
Into the last shining of the light  
Come, drift into the coldness  
Into the silent eternal night

A burning nova in far spheres expands and burns  
The atmosphere ablaze with massive fireballs  
That crush into the ocean tides

Waters invade the seashore life and territory  
Creatures on their run from the invasion in their realm  
But in vain
