

You Can't Hold Us Back

Atari Teenage Riot

Stick the needle in your vein
And the drum beat goes like this...

We live day by day and you never gonna hold us back!
I can see the sky turn white
and you gonna take it out for more!
Are you gonna take it out for more?
Are you gonna take it out for more?
Are you gonna take it out for more?
Are you gonna take it out for more?

And that is the way it's always gonna be
That is the day when they all gonna see
flames and fire, Burning business buildings
Fuckin' politicians Your smile on your nice face makes me spit blood!

And you walk across the line and you start talking behind my back
You start looking for another
Another day to waste my time!
Another day to waste my time!
Another day to waste my time!
And you will wait for a lifetime to spend your life in sunshine

You can't hold us back!
You can't hold us back!
You can't hold us back!
You can't hold us back!
You will never gonna hold us back!

I start walking through the sun...
Yen for soul!
Power me up with wires! Cut them through my body!
Pay me out for nothing...
And I'm gonna keep my smile on my face!

There's nothing you can do...
Just watch me going mad!
Destroy each other to survive!
The whites get nervous and they feel insecure!

You can't hold us back!
You can't hold us back!
You can't hold us back!
You can't hold us back!
You can't hold us back!
You can't hold us back!
You will never gonna hold us back!

I've got nothing more to say! It's the end end of your era....
I really want to see you craving in the streets
With your christian belief! You little fuck!
Fuck, Fuck you!

You can't hold us back!
You can't hold us back!
You can't hold us back!
You can't hold us back!

You will never gonna hold us back!
You can't hold us back!
You can't hold us back!
You will never gonna hold us back!
Lower, Lower, Lower
You will never gonna hold us back!
You can't hold us back!
You can't hold us back!
