

Nights The Lights Went Out In Nyc

Ataris

1. The lights are out in the city tonight
So close your eyes, gaze up at the heavens
And see if you can point me out

R: If I could have one wish tonight
I'd wish upon a satellite
To bring me back to you, to bring me back to you
We spend our whole lives searching for
All the things we think we want
And never really knowing what we have

2. So many paths that we can take
To bring us to our destiny, Gaze up at the heavens
And see if you can point me out

R: If I could have one wish tonight...

*: Be careful what you wish for
These stars are fading out
Be careful what you wish for
These stars are fading

R: If I could have one wish tonight... (2x)
