

Welcome The Night

Ataris

1. Can we understand life and live it at the same time
Where is this purpose you speak of?
I'll be the background of this photograph
The soundtrack to this night and we are fading out before our eyes

R: Close your eyes and welcome in the night
(2x)

2. In heaven so wonderful why are we oh so afraid of dying young
We are dying young We are the patterns and the shapes
The patchwork from the window on this place we are alone, alone, alone

R: Close your eyes...

*: This television set, it burns my eyes and there is no one here
That can keep me warm tonight where is this purpose
Where is the lie, the lie, the lie

R: Close your eyes...
