

# Black Nights

ATB

{One-two-three-four}

Black night, white lights  
Your eyes amplify  
Like a heartbeat  
On the downbeat lover  
Black night, white lights  
On the B-side, I found what I was after

Black night, white lights  
You're so crazy nice  
Like a small town  
Filled with scyscrapers  
Black night, white lights  
So divine, take me downtown be my saviour

And the whole world is you  
On this black night  
Make everything come true  
Under white lights

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

You're on my radar tonight  
You are

Black night, white lights  
Your hand is locked in mine  
Like a chain link  
Sealing the exit  
Black night, white lights  
R.G.B.Y. this photo says I'm taken

Black night, white lights  
You're so crazy nice  
Like a small town  
Filled with scyscrapers  
Black night, white lights  
So divine, take me downtown be my saviour

And the whole world is you  
On this black night  
Make everything come true  
Under white lights

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

You're on my radar tonight  
You are

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up

You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know

Oh, my radar  
Oh, my radar, tonight
