

If It Takes All Night

ATB

This could be the start of something wild
I can see the spectrum in your eyes
I won't let you leave until you're mine
You're gonna love me if it takes all night

If it takes all night
If it takes all night
If it takes all night
You're gonna love me
If it takes all night

Temporary blindness from your light
The universe is built for us tonight
I won't let you go without a fight
You're gonna love me if it takes all night

If it takes all night
If it takes all night
If it takes all night
You're gonna love me
If it takes all night
