

## If It Takes All Night

ATB

This could be the start of something wild  
I can see the spectrum in your eyes  
I won't let you leave until you're mine  
You're gonna love me if it takes all night

If it takes all night  
If it takes all night  
If it takes all night  
You're gonna love me  
If it takes all night

Temporary blindness from your light  
The universe is built for us tonight  
I won't let you go without a fight  
You're gonna love me if it takes all night

If it takes all night  
If it takes all night  
If it takes all night  
You're gonna love me  
If it takes all night
