

A rounded sphere of wisdom  
Spinning to create the now  
Upon it all will wonder who, what, where, and now  
Liquid covers most of her features  
Sunlight covers one side at a time  
Breathers in to keep everything closer  
So it's never far away from  
"earth"!!! That little planet on the hill  
Turning out days to guide by  
Each with its own display  
Some with voltage spinning from the skytop  
Some with light in a peaceful way  
An appearance second to no other  
Such a magnificent face  
So broad and full of perspective  
Known to everyone as...  
"earth"!!! That little planet on the hill  
Seems earth could last forever  
But for us it's not the same  
The neglect to protect the creation  
Leaves us little change remain  
All in all it seems to go around in circles  
Like the path followed by the moon  
Enhanced by the human evolution  
The wisdom of the  
"earth"!!! That little planet on the hill
