

Don't Hold Your Breath

Athlete

Don't hold your breath cause we're running in circles
Silence runs along phone lines
I feel like I am swimming through pavements
And then the dark throws me a lifeline

I'll be the sky that lights up with fireworks
Whenever November comes
And you could be the greatest thing that has happened to me
Though I don't know you now

Don't hold your breath
Cause we've already been here
There are trees to remember you by
These trees are cold but they're anticipating
The sun is gonna give the kiss of life

I'll be the sky that lights up with fireworks
Whenever November comes
And you could be the greatest thing that has happened to me
Though I don't know you now

I'm blowing breath on the windowpane
Sketching your name with my finger
I'm blowing breath on the windowpane
Sketching your face with my finger

I'll be the sky that lights up with fireworks
Whenever November comes
And you could be the greatest thing that has happened to me
Though I don't know you now

I'll be the sky that lights up with fireworks
Whenever November comes
And you could be the greatest thing that has happened to me
Though I don't know you now
