

# Superhuman Touch

Athlete

I'm on fire and nothing's gonna hold me back  
Endless blue sky and a pocket full of tricks to try  
You pick a colour and I'll sing it for you  
I know you feel the same way  
Say, say, say you feel the same way.

Fingertips alive - superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand  
Sparks flying out in every direction  
There's more of this to come I think it must be heaven  
Burning the sun with just a wave of your hand

I'm on fire, golden echoes upon my face  
Tell those dreamers  
They can dream up all they like in this place  
You pick a colour and I'll sing it for you  
I know you feel the same way  
Say, say, say you feel the same way.

Fingertips alive - superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand  
Sparks flying out in every direction  
There's more of this to come I think it must be heaven  
Burning the sun with just a wave of your hand

Just one day like this will keep me going on  
Tender kisses will keep me going on

Fingertips alive - superhuman touch  
Can't get enough of this electric love  
Burning the sun with just a wave of your hand  
Sparks flying out in every direction  
There's more of this to come I think it must be heaven  
Burning the sun with just a wave of your hand

Seems like heaven's broken loose  
It couldn't be more beautiful  
I just want to burn the sun with you  
A messed up garden to inspire  
The greatest minds in all their power  
I just want to burn the sun with you  
In just a wave of your hand.
