Atoms for Peace

It cuts deep, it cuts deep. In human error
Where do I start
We'll be around, we'll be around
Keeping it real, Keeping it real
Skeleton in the closet
And if there's a god, if there's a god
And if he is watching
Who else do you kiss
With those lips, with those lips
The animal's roam, the animal's roam
Out of the forest
These are the rules, these are the rules
and they are cruel
The door is ajar, the door is ajar
Safe in the knowledge
Under the Chinese sun, Chinese sun, Chinese sun
I hope to see you soon, see you soon,
Somehow i doubt it
It's just the rest, of the time, of the time
You came and blew, my mind, my mind
When you get, when you get, faced with, faced with, faced with..
It cuts deep, it cuts deep
Safe in the knowledge
Part of my roots, part of the soil, part of the soil
Before it goes sad, it goes sad, it goes sad
She said no more sad, no more sad, no more sorry
When you get, when you get, faced with, faced with, faced with
