

# Land Beyond The Forest

Atrocity

I walk through the hills  
And march down the plains  
So many years but I was always there  
Deep in my heart I remember the time

Oh father,  
How could you endure this fate?  
I will stand for  
I will fight for I die for the land beyond the forest

Oh yes,  
I will complete what you have begun  
I will face my destiny  
Oh father, I won't fail my final mission

The greenest grass, the whitest snow  
I breathe the air, I absorb the land  
So cold the wind, so high the mountains  
I will never forget this fascination, this closeness, this familiarity

This familiarity I will never forget  
In life beyond death  
I will stand for  
I will fight fir

I will die for the land beyond the forest
