

Come Clean

Auburn

I remember all the times we've shared
Always putting each other before one another
But now something's changed
And we've become something far more distant than brothers.

When did we fall off track?
What happened to us?
What happened to the trust?
I never believed
But I was deceived
I don't know you anymore.

I can't wait to see the look on your face
When this puts you in your place

Now I see the way that you look at me.
Why you've been hiding this is a mystery
And now its time to come clean.

Never again, Will I go through this pain
Never again, Will I be the same...

You go against what you claim to believe,
You are a parasite sucking the life out of me.

Now I hear the way that you speak of me.
Why you've been hiding this is a mystery
And now its time to come clean.

It's a shame; I would have walked a thousand miles in your name.

I'll light this match and walk away
It's hard enough to carry the memories
I'll light this match and walk away
I never thought it would end this way.
