

# Dynamite

Audio Bullys

So if you see me  
Better look away, away, away  
Pretend you haven't seen me  
At least for just today, today, today

She keeps looking my way, she keeps looking my way (4x)

When I look at you  
The stars fall from the sky  
A dynamite into my eyes  
And when you are around  
Every single sound is just the sweetest symphony  
Of you and me

And you don't know me  
Know it anymore, anymore, anymore  
I'm not the same person  
That I was before, before, before

She keeps looking my way, she keeps looking my way (4x)

When I look at you  
The stars fall from the sky  
A dynamite into my eyes  
And when you are around  
Every single sound is just the sweetest symphony  
Of you and me

When I look at you  
The stars fall from the sky  
A dynamite into my eyes  
And when you are around  
Every single sound is just the sweetest symphony  
Of you and me

She keeps looking my way, she keeps looking my way (4x)
