

You need to know  
just how she feels inside.  
You grip her throat.  
She begins to cry.  
When you tear she will bleed more.  
You don't care that she's screaming.

She was infected.  
When will her pain go numb?  
She was infected.  
When will her pain go numb?  
When will her pain go numb.

And It hurts to know.  
It hurts to know inside.  
It won't go.  
The pain will never die.  
When she sleeps  
she will feel you.  
As she sleeps  
she will see you.

She was infected.  
When will her pain go numb?  
She was infected.  
When will her pain go numb?

You don't seem to listen to screams.  
So why don't you listen to me?  
No is all no will ever mean.

She was infected.  
When will her pain go numb?  
She was infected.  
When will her pain go numb?  
She was infected.  
When will her pain go numb?  
She was infected.  
When will her pain go numb?
