

# America

Aura Dione

America  
America  
America

There's a rainbow exploding from my heart  
Things that can grow wings, must be smart  
I have a dress made of stars and stripes

There's secrecy in my mind  
I always look for things I cannot find  
I was born to sing between the lights

All the dreams my father had he never got to do  
He said go out into the world, I want the best for you  
You're my daughter and I only wanna see you shine

If you make it in America you can make it anywhere  
If you make it in America you can take it anywhere

There's a rainbow exploding from my heart  
Neon signs lighting up the dark  
It all begins with an inner spark  
You know you got to go

All the dreams my mother had she never got to do  
She was a dancer but never got to follow through  
She's in me and I'm gonna make her shine

If you make it in America you can make it anywhere  
If you make it in America you can take it anywhere

The only way you'll ever know  
It's when you can't to just let go  
That's how they made it to the moon  
Faith and love

If you make it in America you can make it anywhere  
If you make it in America you can take it anywhere  
If you make it in America you can make it anywhere  
If you make it in America you can take it anywhere

If you make it in America you can make it anywhere  
If you make it in America you can take it anywhere
