

Into The Wild

Aura Dione

I haven't seen you lately, but know a light that's made
of you

I'm always gonna be your friend, what is that to you?

I've become a stranger, but I want to let you in

So much has changed, I don't know where to begin

I see right through you, from beginning to the end

I see right through you, that's what made us friends

You will always be my first love,

You're with me in heart, space and time

You're someone I still think the world of

But we got lost, we got lost into the wild

And I got lost, I got lost into the wild

I never felt that I was cool enough to be your friend

I guess that's kinda funny, don't know how the story
ends

I've never been a pleaser, I've never been a fan

But I never felt any better, than when you took my hand

I see right through you, from beginning to the end

I see right through you, that's what made us friends

You will always be my first love,

You're with me in heart, space and time

You're someone I still think the world of

But we got lost, we got lost into the wild

And I got lost, I got lost into the wild

We live, we live, we live, we live, we live, we live

We live, we live, we live, we live, we live, we live

So fast, so fast

And we got lost, in the past

You will always be my first love,

You're with me in heart, space and time

You're someone I still think the world of

But we got lost, we got lost into the wild

And I got lost, I got lost into the wild

We live, we live, we live, we live, we live, we live

We live, we live, we live, we live, we live, we live

So fast, so fast

And we got lost, in the past

So fast, so fast

And we got lost, in the past.
