

For the Kids

Authority Zero

We were all alone
Throwing caution to the wind
Running so far from home
Facing this world not a care
But to be hand in hand shouting voices
Fuck the world
We'll make it on our own
Breaking out on the road
Looking back now on this life
And what the future holds
Facing this world not a care
But to be hand in hand shouting voices
Fuck the world
We'll make it on our own

And there we were
In the crowd as one
Shouting out again
And there we were
Screaming at the world again

This one's for the kids
For all those years you've left behind
For all the love and all the memories
Now clouded in our minds
This one's for you
All of the broken and abused
Born to lose and of those who decided not to
This one's for you

As time keeps passing away
I see reflections of my friends
And what life used to be
The good times that we've shared
And all those things that we swore to God we'd never be
Yeah we were fighting everything
Oh how I miss those days

When we were in the crowd as one
Shouting out again
Yeah there we were
And we were screaming at the world

But here we are
In the crowd as one
Yeah here we are
And we're still screaming at the world

We were all alone
Throwing caution to the wind
Running so far from home.
