

Stay

Avalon

If you wanna feel all alone
Walk away
Try to find a home of your own
Walk away

And I'm not keeping score
But I've seen it so many times before
Put your bags down this time around

Stay with me, I have all you need
You've tried everything
Yes, everything, now just stay

All you're searching for
Can be found and so much more
No more running away, stay

If you need healing aside
I'm the way
To know you have purpose in life
I'm the way

You can rest assured
You will find all you've been looking for
Sit yourself down so I can be found

Stay with me, I have all you need
You've tried everything
Yes, everything, now just stay

All you're searching for
Can be found and so much more
No more running away

I know you feel that what you find here
Is less than the world has to give
But when did the world ever lay it's life down
So that you might live

Stay with me
Don't you ever leave
You've tried everything
Now just stay

Stay with me, I have all you need
You've tried everything
Yeah, everything, now just stay

All you're searching for
Can be found and so much more
No more running away, stay
No more running away, stay
No more running away, stay
