Out of Character

Avant

Baby I'm tired
I need to catch up on some rest
A lot of working
Goodnight baby, alright goodnight

Listen tonight I wanna do a little something different
Oh, you know if that's alright with you?
Don't be scared baby

Speak of that shawty, anything you experience
I need you to be spontaneous
Tonight you're gonna get out of character

There's nothing that we would do all the time, no
But baby this fantasy is mine
You said you'd try anything once for me
And this is the one that I really need

The way I feel about you won't change
And I'm not tryna make you go both ways
But tonight you need to go both ways for me baby, oh

Speak of that shawty, anything you experience
I need you to be spontaneous
Tonight you're gonna get out of character

I wanna experiment shawty
Take you places you've never been
Let me introduce you to another woman
Tonight you're gonna get out of character

We'll go out to eat the tab is mine
That's where you can meet and unwind
I wanna make sure you're comfortable
'Cause we didn't talk about this once before

Your smile is telling me you have my trust
Girl let's bounce, we're both curious
You, me and she can get it all done
'Cause tonight we'll be as one

Speak of that shawty, anything you experience
I need you to be spontaneous
Tonight you're gonna get out of character

I wanna experiment shawty
Take you places you've never been
Let me introduce you to another woman
Tonight you're gonna get out of character

Lay down, see let us caress your body
Baby it's metaphysical
You can start in the bath and end up on the floor

Speak of that shawty, anything you experience
I need you to be spontaneous
Tonight you're gonna get out of character

I wanna experiment shawty
Take you places you've never been
Let me introduce you to another woman
Tonight you're gonna get out of character

Did you like that baby? Did you like that?
Tell me if it was better than you thought it would be?
Did you like that baby? Did you like that?
Will you ever do that again for me?
Did you like that baby? Did you like that?
Oh, oh
