

Oh, it seems like this room is just too small
Like it's us and no one's here at all
But it's crowded, you made me know 'em all
'Cause you're so close and you're so cold
You got me like

Out of everyone around you've got me up in the clouds
How you stand out from the crowd
What did you do to make me notice 'cause it showed
Your sensuality, sensuality

Oh baby you're what sounds like sex to me
Skin so soft that it intoxicates me
Nowhere else to go, so girl let's leave
I'm drivin' and you're ridin'
I can feel it baby

Out of everyone around you've got me up in the clouds
How you stand out from the crowd
What did you do to make me notice 'cause it showed
Your sensuality, sensuality

You and me equals sensuality
I'm open to any suggestions from you
Excited, I can lick your body
Shiver, if you get close to me
I'll make sure you're pleased

Out of everyone around you've got me up in the clouds
How you stand out from the crowd
What did you do to make me notice 'cause it showed
Your sensuality, your sensuality, sensuality
Your sensuality
