

# Unchain the Light

Avantasia

Who's got the answer  
Is this what I'm looking for  
And who do I talk to  
What do I have to explore  
Attend to your god given duty  
You'll be taking your heaven by force  
How could you choose  
With your head in the noose  
With no time to lose

High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death, we're  
High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death and I'll chain the light  
I'll bring it right down to illuminate unholy ways, we'll chain the light

Too worn out to wonder  
We might not want to overextend them no more  
Our beautiful spook lights are all they will need  
All they will want to explore  
And after it's all said and done  
We won't fear the transience no more  
Cause we don't realize  
Idle glance in our eyes  
Let precision prevail

High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death,  
we're  
High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death and I'll chain the light  
I'll bring it right down to illuminate unholy way, we'll chain the light

You look above  
to see inside yourself  
and find time standing still  
You see the world in different light  
You turn this moment  
into what you think it's ought to be  
Demystify the dark  
High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death,  
we're

High up in the open skies  
We'll chain the light  
We'll take the time from those it does to death and I'll chain the light  
I'll bring it right down to illuminate unholy ways
