

Betrayed

Avenged Sevenfold

Passion in my eyes, I lived it everyday, but how could you go t
hrow it all away?

In my dreams it's me and you, it's there I saw it all come true
As time went by faith in you grew, so one thing's left for me t
o do

I feel it burn inside, burn in me like the rising sun
Lifted into the sky, took away the only thing I loved
I know after tonight all your power crumbles in my arms
So don't worry, I'll be fine, when my life ends, I'll leave thi
s scar

[Spoken:]

And I felt down I need you there
Every note and every word seems so hard to take
Finally, we're destined

A smoking gun in hand, now don't you realize what you've done
Put a bullet in his back, your hero since you were so young
How could you kill the man who brought salvation through your p
ain
He must mean everything to end it all this shameful way

Passion in my eyes, I lived it everyday, but how could you go t
hrow it all away?

In my dreams it's me and you, it's there I saw it all come true
As time went by faith in you grew, so one thing's left for me t
o do

I started here so young and helped you get along
Just did it for the love, and people healed through us
Don't live your life in vain, don't take it out on me
You're cracked, so just remember, I'm not your enemy
I don't deserve to fall this way, by a man who felt betrayed

I felt so down now you're around to rescue me
Every note and every word I'm listening, yeah
Sometimes problems seem too deep to take (too hard to take)
Sometimes I cry thinking my future looks so bleak

Finally, together we were destined, I know what's best for us i
n the end
Someone hear me, someone stop me, someone listen, why aren't yo
u listening?

Passion in my eyes, I lived it everyday, but how could you go t
hrow it all away?

In my dreams it's me and you, it's there I saw it all come true

As time went by faith in you grew, so one thing's left for me t
o do

In my dreams it's me and you, it's there I saw it all come true
As time went by faith in you grew, so one thing's left to finis
h you (hahaha)
