

Planets

Avenged Sevenfold

Godless, meteoric war
Anger, our existence nevermore
You awoke the giants who were dormant in the sky
Comets reigning death from a fiery eye!

Mother of all, your time is coming
One with eternity
When planets collide!
Planets collide!

Damage, galaxy destruct
Endless, celestial orbit corrupt
You will be forgotten like the others lost in time
Dead civilization, left behind!

Mother of all, your time is coming
One with eternity
When planets collide!
Planets collide!

Take heed the violent march is closing in
You can't defeat them on your own
Weapons are longing for the final stand
And their all aimed at you from heaven!

Planets collide!
Planets collide!
Planets collide!
Planets collide!

You will be forgotten like the others lost in time
Dead civilization, left behind!

Mother of all, your time is coming
One with eternity
When planets collide!
Planets collide!
