

## Bloodlust

Avenger

Fight, we will not fight again  
Crashing down our swords in men  
Kill and be killed for a facts  
With no gain to all at last  
Politicians tumble on tongue  
Fight themselves than stand as one  
Play with lives, they got no  
Personality respect

Get up and scream - Get up and scream  
Throw your fists in the air  
Get up and scream - Get up and scream  
Stand against the war

You see hell's weapon  
Cold steel Bloodlust

Fear, it's fear what lames the brain  
They submit and go insane  
Fuck the war machine instead  
It's your live, so free your head

You are the evil but I'm not your slave  
Call it defence, it's an highway to the grave

You see hell's weapon  
Cold steel Bloodlust
