

# Building Better Worlds

Aviators

When the darkness closed in all around  
It didn't bring us down  
It only made stronger for those days  
When they turned our dreams to distant thoughts  
The embers still burned hot  
And now the flames will blaze

So let them burn  
They set the fire  
Now we can see  
How they conspire  
But they've been shattered  
Like broken glass  
And now we're building better worlds  
On the ashes of the past

When oppression came here from all sides  
We didn't take their lies  
We saw a revolution rising  
When they asked us why we're not the same  
We wouldn't play their game  
We are the voices crying

So let them burn  
They set the fire  
Now we can see  
How they conspire  
But they've been shattered  
Like broken glass  
And now we're building better worlds  
On the ashes of the past

But no the battle isn't won  
The war has only just begun  
And we'll keep fighting, keep building, a better place for us  
And if they strike us down tonight  
We'll sear the darkness with the light  
It's revolution time, and you're on our side

So let them burn  
They set the fire  
Now we can see  
How they conspire  
But they've been shattered  
Like broken glass  
And now we're building better worlds  
On the ashes of the past

So let them burn  
They set the fire  
Now we can see  
How they conspire  
But they've been shattered  
Like broken glass  
And now we're building better worlds  
On the ashes of the past

So let them burn (So we'll let them)  
They set the fire (burn tonight)  
Now we can see (Watch the flames light)  
How they conspire (Up the sky)  
But they've been shattered (Shattered like a)  
Like broken glass (Broken glass)  
And now we're building better worlds  
On the ashes of the past
