

# City Lights

Avicii

City lights, take me away  
Now it's time, we never ever head down  
Don't be scared, I am for real  
Hide away and we will never be found

It's alright, we never look back  
Birds will sing if we fall  
It's alright, with memories inside  
Midnight, passed on the floor  
Watch it turn into gold

And I don't even know what's real  
And I don't know what to feel  
I'm the truth in the sky, so I'm in love with your light  
Set me free and settle down  
And I don't know what to feel  
No I don't know what to feel

Cities lights, we're getting away  
Heads won't find us, we're not making a sound  
We're not scared, we are for real  
Y'all can't turn us, now we're shutted by lights

It's alright, we never look back  
Birds will sing if we fall  
It's alright, with memories inside  
Midnight, passed on the floor  
Watch it turn into gold

And I don't even know what's real  
And I don't know what to feel  
I'm the truth in the sky, so I'm in love with your light  
Set me free and settle down  
And I don't know what to feel  
No I don't know what to feel
