

For A Better Day

Avicii

Hurt
On a caution wind
Meet the bleeding sky
I called your name
There was no one there
And in the cold and snow
I saw your face

I sang the song for the little things
Magic call, but the joy you bring
Running it down the line
Wish you could find that love is a fragile thing
Magic call from a pretty thing
Maybe it might be time
For a better day
For a better day
For a better day

Straight, from the path of love
In the road of life
I tumble forward
But going on, I'mma keep it strong
I saw your face

I sang the song for the little thing
Magic call, but the joy you bring
Running it down the line
Wish you could find that love is a fragile thing
Magic call from a pretty thing
Maybe it might be time
For a better day
For a better day
For a better day
For a better day
For a better day
For a better day

I sang the song for the little thing
Magic call, but the joy you bring
Running it down the line
Wish you could find that love is a fragile thing
Magic come from a pretty thing
Maybe it might be time
For a better day
