

Talk to Myself

Avicii

Alone, I'm searching for devotion, in the faded melody
My soul is trying to cross an ocean, down on bended knee
Lock up my condense and rhyme, don't know what I'm trying to say
(My heart) all the time was stolen, by bad poetry

Some nights I talk to myself, I said the words that I could say
to no one else
And some nights I talk in my sleep, I said the words I never said
when you were with me
Some nights I talk to myself, I said the words that I could say
to no one else
And some nights I talk in my sleep, I said the words I never said
when you were with me

I'm gone, the nightmares cut me open, love's insanity
So long words are left unspoken, couldn't set them free
Watch all the language run dry, thoughts go on holiday
(My heart) I'm left with a broken vocabulary

Some nights I talk to myself, I said the words that I could say
to no one else
And some nights I talk in my sleep, I said the words I never said
when you were with me
Some nights I talk to myself, I said the words that I could say
to no one else
And some nights I talk in my sleep, I said the words I never said
when you were with me

Some nights I talk to myself, I said the words that I could say
to no one else
And some nights I talk in my sleep, I said the words I never said
when you were with me
