

## 4 N Sick

Avulsed

Cold cadavers open wide  
In the dissecting stretcher with rigid factions  
Eviscerating limbs nearly petrified  
Reeking viscous fluids in livid putrefaction

But to avoid these nauseous odours  
The only way is a living autopsy  
Getting high patients with perfect health  
Flesh palpitating organs to extract

Bright kidneys, spongy pulmons, dense liver  
Juicy spleen, red meaty heart  
Hot pancreas, slimy stomach, gooey urethra  
Relaxed backbone, twisted intestine

4 n sick

To get a perfect unknown candidate  
It had to be a worthless homeless without any family

Male or female any sex was fine  
Nobody will miss a piece of white trash in his society

It was weary to work with corpses  
To improve a promising forensic career  
Extracting living innards is the biggest experience  
It can?t be compared, it?s pure gore
